APOORVA KALYANI

Senior .NET Developer

+31 657707866 apoorvakkalyani@gmail.com https://www.linkedin.com/in/apoorva-k-404878227
Almere, Netherlands

EXPERIENCE

Performance Engineer

Stream HPC

02/2025 - Present Amsterdam, Netherlands

- Worked on benchmarking and performance analysis for GPUs across HPC workloads .
- Tuned applications and kernels using autotuning techniques to get better performances across different GPU configurations.
- Added and validated new performance features in the GPU software stack.
- Analysed and fixed critical GPU issues , improving reliability and quality.
- Built a benchmarking platform from scratch, handling both backend and frontend part of the software
- Integrated frontend with benchmarking database to visualize the performance results.

Senior .NET Developer

Philips

08/2020 - 11/2024 Bangalore, India

- Resolved 50+ critical defects, enhancing product stability by 30%.
- Conducted on-site testing at Haifa, gaining insights into 15+ subsystem installations and scanner testing.
- Led a multi-repository project, achieving a 40% enhancement in performance and feasibility.
- Contributed to product development with 10+ new features.
- Organized 10+ internal events, boosting team morale.
- Engaged in SW-COE initiatives and 3 hackathons, fostering continuous learning.
- Planned and demonstrated the Workflow Engine POC to 20 stakeholders.
- Completed 5 major projects on time using Agile methodology.

Intern .NET Developer

Philips

01/2020 - 08/2020 Bangalore, India

- Designed an Automation Development System Setup Tool, increasing setup efficiency by 40%.
- Managed system requirements in DOORS, reducing errors by 20%.
- Organized 10+ internal events to enhance team collaboration.
- Adhered to Agile methodology, completing 5 major projects on time.

Intern Arduino and Assembly C Developer

Contriver

07/2019 - 12/2019 Mysore, India

- Gained expertise in embedded systems and IoT, familiarizing with 10+ sensors.
- Studied IoT applications, completing a course with 100% proficiency.
- Programmed NodeMCU and Arduino to interface with sensors, uploading data to Firebase, and integrated it with a mobile app.
- Developed a health monitoring mini project with 95% data accuracy.
- Improved team efficiency by 30% through enhanced technical skills and teamwork.

Intern Microprocessor and Signal processing

Akashvani

06/2019 - 07/2019 Mysore, India

- Mastered 5+ microprocessor architectures and signal processing techniques.
- Participated in 3 workshops on assembling and broadcasting radio signals, completing projects with 100% accuracy.

EDUCATION

Bachelor of Electronics and Communication

GSSSIETW (VTU)

08/2016 - 08/2020 Mysore, India

GPA
7.3 / 10

SUMMARY

With 5+ years of experience, I aim to pursue a dynamic and fulfilling career where I can consistently deliver exceptional results within defined timelines. Seeking an opportunity with a forward-thinking organization to leverage my skills and abilities to contribute innovatively while remaining adaptable and resourceful.

COURSES

Backend development for .NET Full Stack
Coursera

.NET Full Stack Foundation
Coursera

C# for .NET Developers
Coursera

Cloud Computing
NPTEL

SKILLS

.NET | C# | C++ | Python | MySQL | Firebase | Git | TFS | WPF | WCF | Apache Superset | SaaS boilerplate | Django | HIP | Docker

PROJECTS

GPU AI framework

Stream HPC

Focusing on GPU performance, optimization , new feature implementation and validation.

Benchmarking platform

Stream HPC

Built an end to end benchmarking platform for easy analysis and visualization of performance data.

Multi Repo

Philips

The project partitioned the repository into domain-based segments, reducing tight coupling and enhancing visibility into each domain's modifications.

CT5400 and CT7500 IB

Philips

Optimized backend request handling to enhance software efficiency. The CT7500 Install Base (IB) project systematically addressed critical defects and customer observations.

KEY ACHIEVEMENTS

Your Achievement

Received PIC (Philips Bangalore) award in Patient Safety, Quality and Integrity Always.
